SUMMARY

Full Stack Developer with 5+ years shipping production-grade SaaS and fintech applications using Next.js, React, Node.js and TypeScript. Experienced working across distributed teams and delivering features async. Focused on clean architecture, measurable performance wins, and high-impact shipping.

SKILLS

- Frontend: Next.js, React, Vue.js, TypeScript, JavaScript, Tailwind CSS
- Backend: Node.js, Express.js, REST APIs, JWT Authentication
- Databases: MongoDB, PostgreSQL
- DevOps & Tools: Docker, AWS, GitHub Actions, AWS CodeBuild, Terraform, Git, CI/CD

PROFESSIONAL EXPERIENCE

Software Engineer — Programmers Force

August 2024 - Present

- Delivered production-ready features across 6+ client projects on schedule — owning full-stack development from API design to frontend implementation in an Agile/Scrum environment.
- Built RESTful APIs with JWT authentication and role-based access control, supporting 1,000+ concurrent users across multiple applications.
- Converted Figma designs to pixel-perfect React UIs — reduced design-to-code time by 30%.
- Optimized database queries and frontend bundles, improving average page load time by 40% across production apps.
- Contributed to shuftipro.com — enterprise identity verification SaaS.
- Maintained CI/CD pipelines using GitHub Actions — automated testing and deployment across client projects.

Software Engineer — Finz Games

May 2021 - July 2024

- Built and maintained RESTful APIs across 3+ web applications — handling backend architecture, database design, and third-party integrations from concept to production.
- Reduced runtime memory overhead by 25% through performance profiling and targeted optimizations on Node.js backend services.
- Implemented structured error handling and debugging workflows — cut average production issue resolution time by 60%.

PERSONAL PROJECTS

Connect Wheels

- A social car platform where users create garage profiles, post car listings and feeds, and connect via real-time chat. Built with microservices architecture, API Gateway, JWT authentication, and WebSocket-powered messaging. Developed full-stack — RESTful APIs, responsive frontend, and secure multi-user session handling.
- **Tech Stack:** Node.js, TypeScript, Express, MongoDB, PostgreSQL, React

MihRM — Employee Management System

- Role-based HR platform with separate dashboards for admins, managers, and employees. Features include attendance tracking, leave management, and reporting — designed for small to mid-size teams.
- **Tech Stack:** Node.js, Express, MySQL, Vue.js

EDUCATION

University of Management and Technology , LAHORE

CGPA: 3.81 | Silver Medalist

Dec 2018 - Dec 2022

BS(CS)
