SUMMARY

Full Stack Developer with 4+ years of experience building production-grade web applications using Next.js, React, Node.js, TypeScript, and MongoDB/PostgreSQL. Delivered scalable systems across fintech and enterprise domains — including microservices platforms, real-time applications, and role-based systems. Focused on performance optimization, clean architecture, and shipping high-impact features.

SKILLS

- Frontend: Next.js, React, Vue.js, TypeScript, JavaScript, Tailwind CSS
- Backend: Node.js, Express.js, REST APIs, JWT Authentication
- Databases: MongoDB, PostgreSQL
- DevOps & Tools: Docker, AWS, Git, CI/CD

PROFESSIONAL EXPERIENCE

Software Engineer — Programmers Force	August 2024 - Present
• Delivered production-ready features across 6+ client projects on schedule — owning full-stack development from API design to frontend implementation in an Agile environment. • Built RESTful APIs with JWT authentication and role-based access control, supporting 1,000+ concurrent users across multiple applications. • Converted Figma designs to pixel-perfect responsive UIs using reusable component libraries — reduced design-to-code time by 30%. • Optimized database queries and frontend bundles, improving average page load time by 40% across production apps.	
Software Engineer — Finz Games	June 2022 - July 2024
• Contributed to full product lifecycle across multiple web applications — handling backend API development, database design, and frontend integration from concept to production. • Reduced runtime memory overhead by 25% through performance profiling and targeted optimizations on Node.js backend services. • Implemented structured error handling and debugging workflows — cut average production issue resolution time by 60%.	

PERSONAL PROJECTS

Connect Wheels
• A social car platform where users create garage profiles, post car listings and feeds, and connect via real-time chat. Built with microservices architecture, API Gateway, JWT authentication, and WebSocket-powered messaging. Developed full-stack — RESTful APIs, responsive frontend, and secure multi-user session handling. • Tech Stack: Node.js, TypeScript, Express, MongoDB, PostgreSQL, React
MihRM — Employee Management System
• Role-based HR platform with separate dashboards for admins, managers, and employees. Features include attendance tracking, leave management, and reporting — designed for small to mid-size teams. • Tech Stack: Node.js, Express, MySQL, Vue.js

EDUCATION

University of Management and Technology , LAHORE	Dec 2018 - Dec 2022
CGPA: 3.81 Silver Medalist	BS(CS)
